| Nitrites | < 200 mcg/mL | <200 mcg/mL | NORMAL |

Additional Comments

Drug confirmations performed by mass spectrometry.

Certifying Scientist: A. Cobbs

Note: Urine drug and metabolite concentrations do not correlate with blood drug concentrations or medication dosage. Aegis Sciences Corporation does not compare urine drug and metabolite concentrations to the dose of drug prescribed or administered to the patient. Normalized results have been calculated using a factor that adjusts the original results up to those of an ideal urine with a specific gravity equal to 1.0200. Alcohol and alcohol metabolites are not normalized.
